Education

State University Collage of New York at Buffalo BS 1969, MS 1973

Teacher at Kenmore Town of Tonawanda Schools 1969-2002

I majored in science and spent 33 years teaching biology, chemistry and general science in Kenmore, New York. I painted in my spare time and belonged to the Kenmore Art Society and the Tonawanda Council on the Arts. When we retired my husband Jack and I moved to the beautiful Carolina beach. The contrast with the weather in Buffalo was amazing. I could devote my time and energy to creating art full time in my new studio. Images half buried were surfacing

I work with acrylic paint and additives. My work often includes textures built of sand, paper and found objects. The ying and yang of light and dark work against each other to create complex dynamics on the surface of the canvas. I have produced several series of paintings including a dragon series, variations of heart shapes, space routes and animal totem paintings.

I am an active member and former president of the Carolina Artists Studio Gallery in Morehead City where my work is always on display. Carolina Artists Gallery is a nonprofit gallery for local artists and is involved in community outreach programs.

I have exhibited in the following venues among others:

Arts Council Art from the heart
Emerald Isle Friends of the Library
Chatham Hill Winery, Cary NC
Emerald Isle Department of Recreation Artist of the month
Family Furniture, Swansboro NC
